	OMNI C2	160	16.0	\$547,520	\$63,040	\$610,560	N/A			
	OMNI T2	200	20.0	\$684,400	\$78,800	\$763,200	N/A			
3" to 10"		N/A ⁴								

¹ Contact your water provider to determine the appropriate meter required.

² Fee factors are based on the recommended maximum continuous flow rate for that meter, which is the manufacturer-specified maximum flow rate for non-displacement type meters.

³ Zone 7's fire-service exemption applies to combined domestic and fire service connections up to a maximum one-inch (1") meter size. The exemption only applies to single family and duplex housing units with fire sprinkler systems approved by the appropriate fire department and installed in accordance with applicable building requirements. For all exempt meters, Zone 7 determines the fee factor by subtracting 15 gpm from the meter's maximum continuous flow rate, then dividing the total by 10 gpm. The fire-service exemption does not apply to meters with a capacity less than 25 gpm.

⁴ Contact Zone 7 for connection fee amount for meter sizes three inches (3") and greater.
