Chain of Lakes Conveyance System Project

Zone 7 / City of Pleasanton
Liaison Committee
February 24, 2026

Project Overview

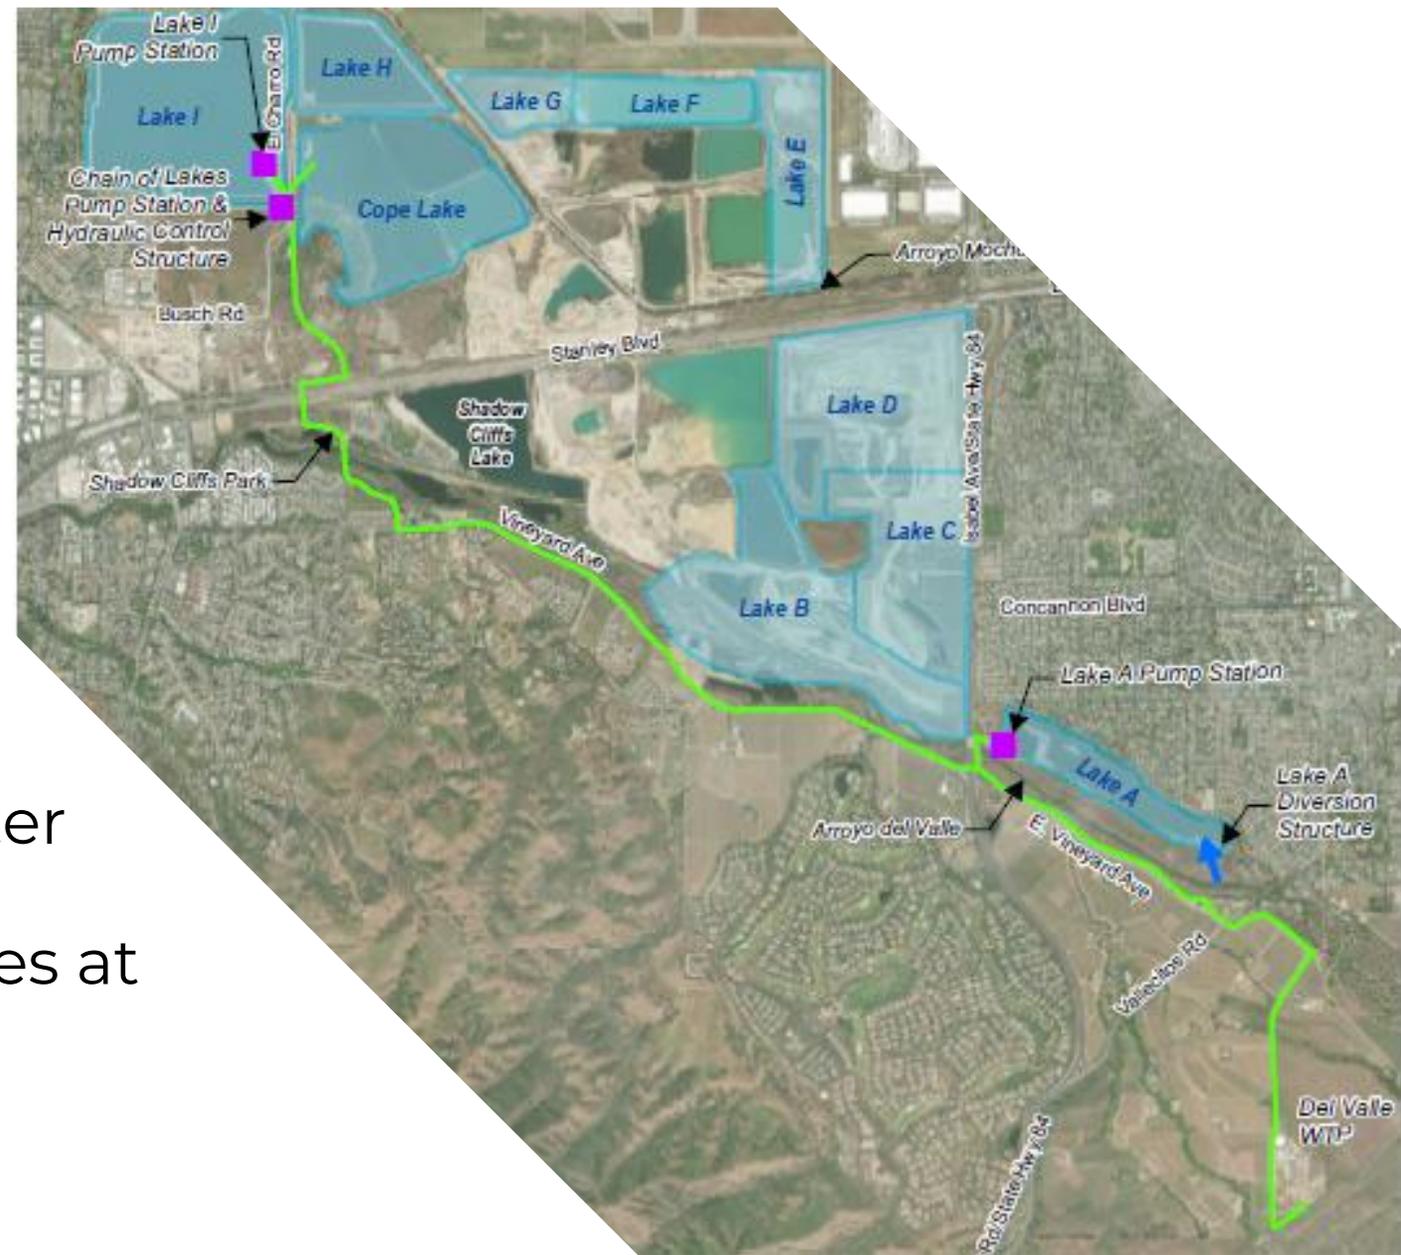

The Chain of Lakes Conveyance System (COLCS) would enable Zone 7 to store available water during wet periods, allowing access during dry periods and emergencies

Water would be utilized:

- Indirectly through groundwater recharge, and
- Directly by pumping to DVWTP

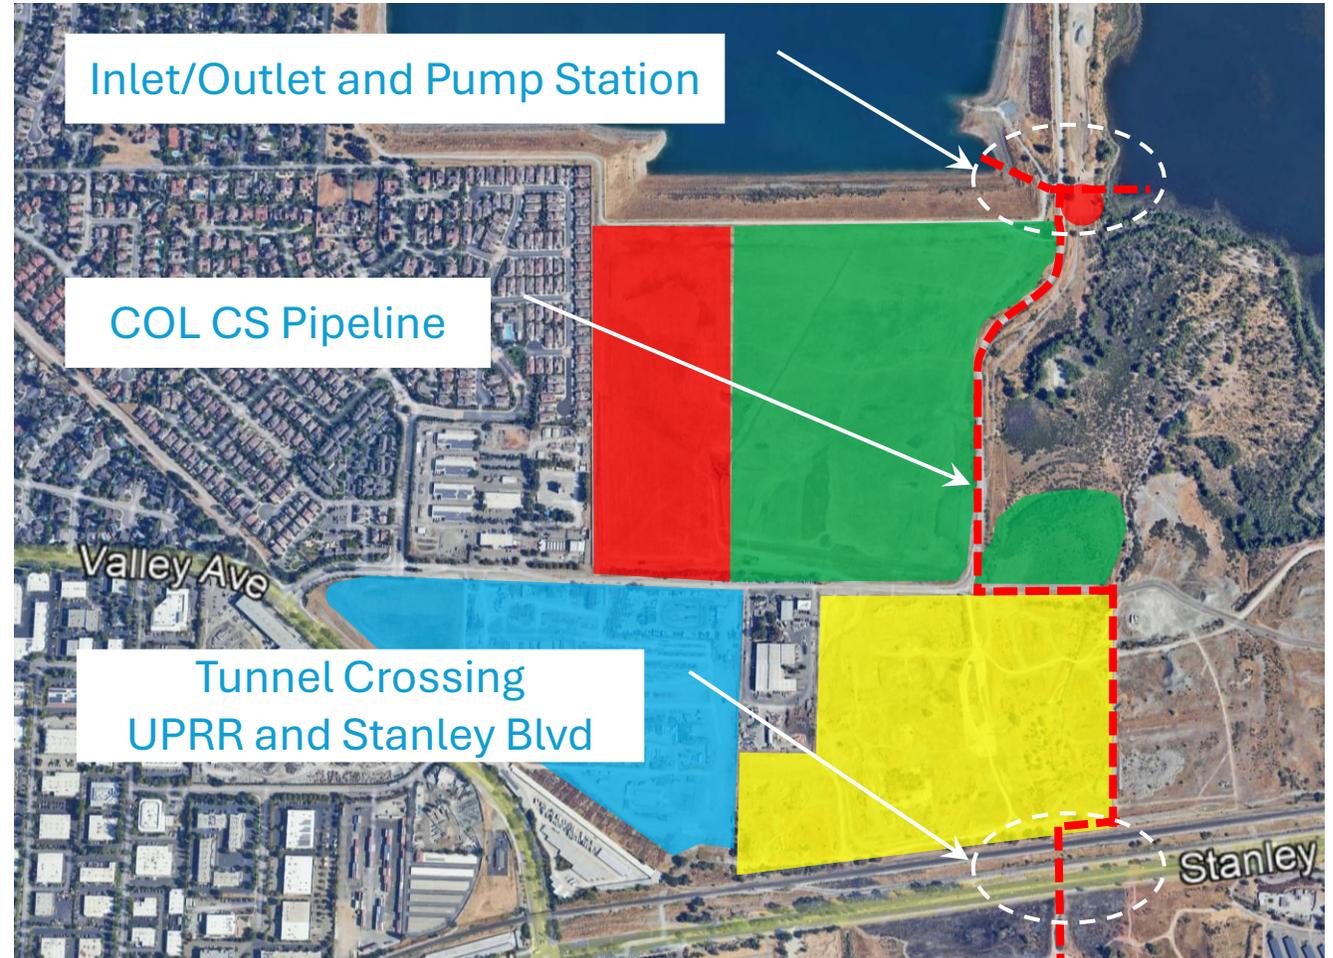

COLCS - Facilities

- Existing Storage
 - ~30,000 acre-feet in Lake I and Cope Lake
- New Facilities
 - 7-Miles of 42-inch diameter pipeline
 - Inlet/outlet works
 - Pump Station to deliver water to DVWTP
 - Additional treatment facilities at DVWTP

Pipeline Alignment Coordination

- Discussions underway with City staff
- Coordinate with planned road and development in East Pleasanton area
- Coordinate alignment along East Vineyard Ave. to Isabel
